status**

**Why am I
here?**

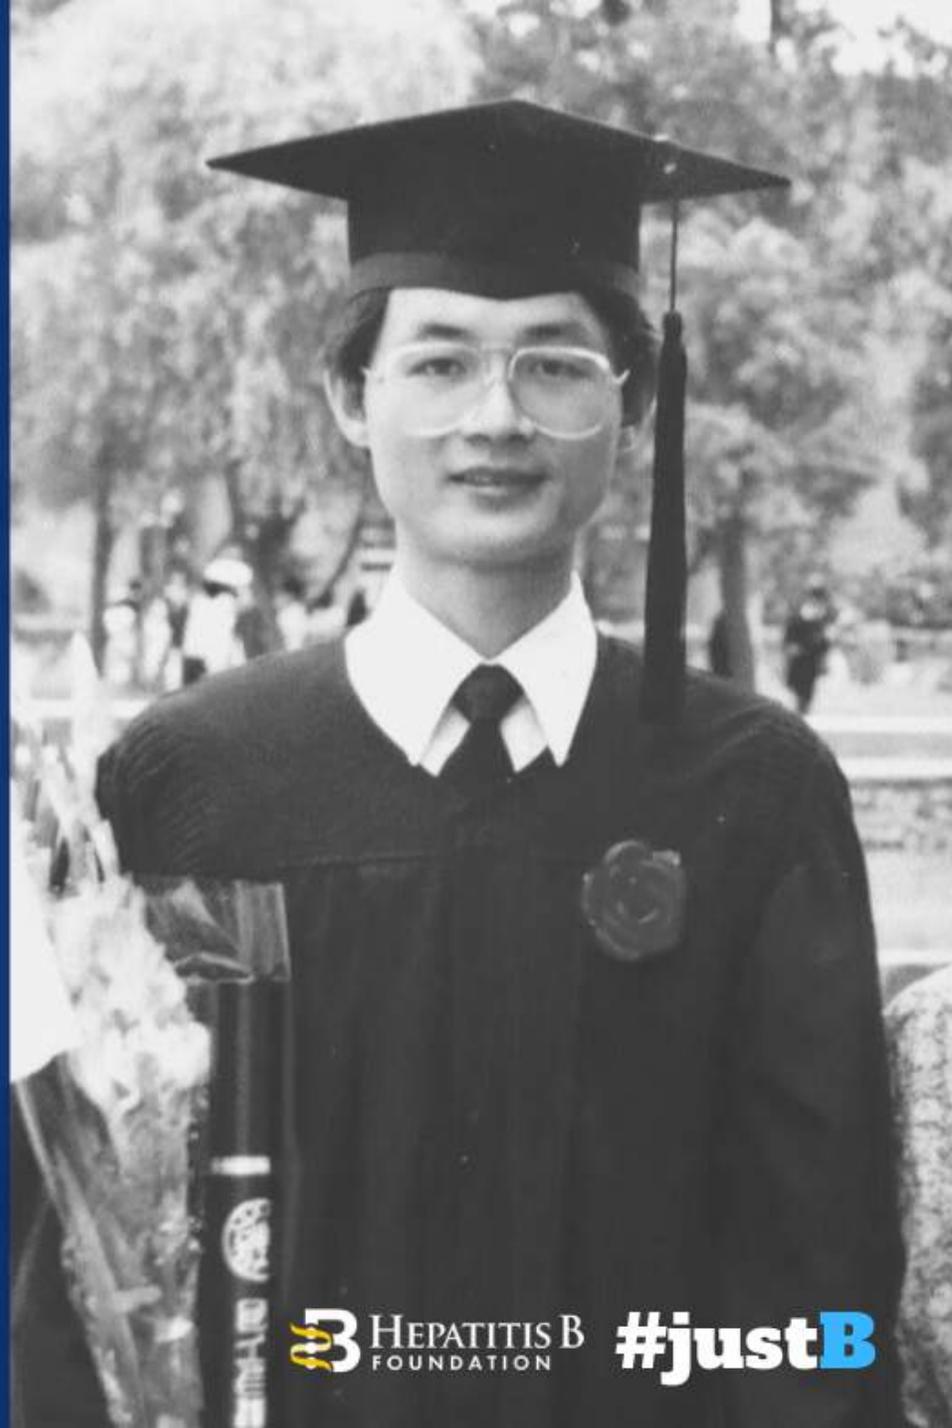

**My
background**

“

I came to the US from Taiwan for my PhD studies. After I finished my degree, I got a call from my sister. She said, “Our brother is in the hospital. You need to come back.”

I worried about my siblings, my aunts and uncles... And I worried about myself. I wondered, “Am I hepatitis B positive?”

care**

**My son's
vaccination
& HBIG**

“Later, we found out my wife also has hepatitis B. When she got pregnant... we researched and got her treatment with antivirals during her last trimester. This, together with the hepatitis B vaccine and immunoglobulin, successfully protected our son.”

#justB Treated

“Today, my brother has been cured for ten years. This is rare for liver cancer. I feel so grateful to him because if he hadn't gone through what he did, I would never have known I have the virus. My wife and I are living healthy and taking antiviral medications. And all of our kids are free from hepatitis B.”

Taiwan Hepatitis Information & Care Association (THICA)

Taiwan Hepatitis Information and Care Association (THICA) was formed by 51 viral hepatitis patients who decided to establish a patient association after cross-sharing knowledge on social media platforms for years. Their mission is to share the latest information on viral hepatitis, promote awareness, prevention and treatment of the disease, and link patients to appropriate medical care. THICA has almost 10,000 followers on Facebook and a strong Twitter following and presence.

Jacki's Take Home Messages

If you don't know your status, **get tested.**

If you are HBs Ag positive, **monitor regularly.**

Once you are tired of the virus, **get treated.**

Protect your next generation.

If unfortunately liver cancer occurs, **don't give up.**

Liver cancer is curable.

Liver cancer is preventable.
